

To Our Valued Customers

High Tech Industries' ISO/TS 16949:2009 certificate expired on 9/14/18. We are currently in transition to become certified to the ISO 9001:2015 standard, and although there will be a certification lapse, the quality of our products and processes will not diminish during this transition time. When we receive our new certificate stating our conformance to the ISO 9001:2015 standard, it will be posted to HTI's website for easy downloading.

Should you have any questions or concerns regarding High Tech Industries re-certification strategy, please contact Jodi Wszolek, Quality Manager, at 616-796-0152, or Jodi@hightechindustries.com.

Thank you for your continued confidence in our abilities to meet and exceed your expectations.

High Tech Industries Management Team
